

Why 27G?

- Easy entry with superb self-sealing capability of the wound
- Eliminates the risk of wound-integrity related complications
- Gentler surgery with slow inflow and outflow
- Micro-instrumentation with ultra-minimally invasive manipulations
- Substantially less postoperative inflammation
- Reduced patient discomfort with faster visual rehabilitation

Ideal for the Following...

- Epiretinal membrane proliferation
- Idiopathic or secondary macular hole
- Macular traction syndrome
- Macular edema associated with diabetic retinopathy
- Retinal vein occlusion
- Uveitis
- Persistent pseudophakic cystoid macular edema
- Subinternal limiting membrane hemorrhage
- Simple vitreous hemorrhage
- Vitreous biopsy
- Moderate proliferative diabetic retinopathy (with or without focal tractional retinal detachment)
